

# COVID-19 SAFETY recommendations for FOR TOUR OPERATORS

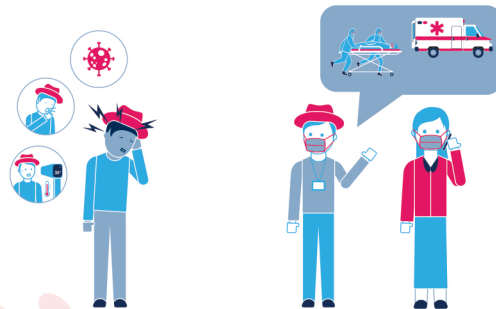

**1** Keep informed of the latest Covid-19 announcements, restrictions and requirements before each trip. Ensure that your tour guides and drivers are well trained in Covid-19 safety; and they understand their roles and responsibilities implementing all of the measures which your company and the community are taking to reduce risks to tourists, community members and your staff

**3** Provide your tour guides or drivers with plenty of hand sanitizer and face masks in case tourists have forgotten or lost theirs

**2** Always book tours and community based tourism (CBT) in advance. Do not expect communities to be able to manage last minute bookings or unannounced visits

**4** Prepare a waste bin with a lid so that personal waste can be removed from the community (e.g. tissues, face masks, water bottles). Prepare a specific, clearly marked area for this bin, and then dispose of the waste safely and carefully. Do not leave this waste for the community to manage

**5** Be prepared for an emergency: Check the location of the community quarantine area in case tourists or tour guides are suspected of being sick with Covid-19 symptoms. Make sure you have planned arrangements and set specific routes to pick up and transport sick people from the quarantine area to the most appropriate hospital (identified in your Covid-19 safety plan)

**PLEASE FOLLOW THE GUIDELINES AND STAY SAFE!**
